

Patient Care Software System

The Power of eNavigator Patient Care System Only From Diplomat

Detection of clinically relevant interventions can now be assessed using our electronic patient care system. Diplomat developed an exclusive, proprietary software covering a spectrum of disease states. We call this interactive, fully electronic computer system our eNAV Software System™

Committed To Unparalleled Innovations

With help from expert opinion, several leading software development companies, and internal clinical support, we are plotting a new course in modern healthcare technology using our eNav™ software. Within this streamline, state-of-the-art software are housed the core pieces of our pre-existing high-touch patient care models, transcended into the digital world.

Diplomat's eNav™ Offers Guidance Through:

- Prior Authorization Assistance
- Patient Funding Assistance
- Pharmacist & Nurse Clinical Reviews
- Complete Medication History
- Medical Study Content
- Disease Education
- Disease Symptom Management
- Relapse Education
- Contraindication Screening
- Laboratory Monitoring
- Drug Education
- Drug Side Effect Education
- Drug Side Effect Monitoring
- Injection Training
- Injection Site Side Effect Education
- Injection Site Technique Assessment
- Injection Site Technique Adherence
- Nurse Scheduling
- Adherence & Compliance Assessment
- Depression & Quality of Life Screening
- Physician Satisfaction Survey
- Patient Satisfaction Survey
